Should we not carry a part for which you're searching, we can always order it for you and receive it within a timely manner.

Warranty Service and Repairs

Chrysler, Dodge, Jeep, or Ram vehicle that's under warranty or has been recalled, then stop by your local Edmonton area Chrysler dealership, Grove Dodge in Spruce Grove. Our certified Chrysler technicians have the expertise to take care of all of your Chrysler warranty and recall service needs, no matter what the issue may be. From your Ram truck warranty to recalls on midsize sedans, the team at Grove Dodge has you covered.

About Chrysler's Warranties

While Chrysler models are well-known for their dependability, everyone knows that there's a risk of damage when you drive a car for long enough. That's why Chrysler provides very generous warranties on their vehicles, including:

- 5-year/100,000-mile Powertrain Limited Warranty - Almost all new Chrysler vehicles are insured with purchase, so when you end up with an engine, transmission, or drive system problem, Chrysler will have your vehicle towed to Grove Dodge to be fixed, free of charge.
- 5-year/100,000-mile Roadside Assistance Warranty - When you're driving your new Chrysler you can rest assured that the team at Grove Dodge is there for you whenever you need us with free jump start assistance, fuel delivery when you're out of gas, tire service, lockout service, and towing from a mechanical breakdown.

CUMMINS 6.7L Turbo Diesel

If you're interested in using the 2014 Ram 2500 and 3500 pickups for rugged, heavy-duty tasks over long periods of time, you can't go wrong with the 6.7L Cummins I-6 Turbo Diesel engine. This powertrain is the ultimate in Ram diesel capability and its specifications feature best-in-class torque, towing, and oil-change intervals. Let's have a closer look at what this diesel engine can do.

Output Capabilities for the 6.7L Cummins I-6 Turbo Diesel

One of the most interesting features for this diesel engine is that total power and torque depends on which transmission it's mated to.

- **G56 Manual Six-Speed Overdrive Transmission:** No matter which gear you're in, this transmission synchronizes them all for optimum shift points. With this transmission equipped, the Cummins I-6 Turbo Diesel puts out 350 hp and 660 lb.-ft. of peak torque.
- **68RFE Automatic Six-Speed Transmission:** Using three planetary gear-sets, one overrunning clutch, and full electronic control, this transmission unlocks even more Ram diesel capability. When the 68RFE Automatic is mated to the Cummins Turbo Diesel, it receives a 370 hp rating and an 800 lb.-ft. torque rating.
- **AISIN AS69RC Automatic Six-Speed Transmission:** Available only with the 2014 Ram 3500 6.7L Cummins I-6 Turbo Diesel engine, this transmission features higher gear ratios for increased towing capacity and increased performance output. This engine is capable of 385 hp and a whopping 850 lb.-ft. of torque when mated to the AISIN AS69RC Automatic.
